

**Ai is back.
20 years of Ai Records
Mad eh. Just like this release
that has taken a year to make.
Thats dedication!!!!**

After twenty years, the illusive London-based label, Ai Records, is celebrating with this unusual release.

Ai Records has helped to pioneer underground electronic music for two decades with a very carefully curated artist roster. Over the years we've seen them bring us releases from Datasette, Convextion, Najem Sworb, Claro intelecto, SINNER DC (to name a few).

To celebrate the record label's return, Ai is releasing a new album entitled "If i could only hear the sound of the waves again." by the band SINNER DC.

This new album "if I could only hear the sound of the waves again" is the bands third for the label.

They take on a denser more immersive sound than their previous albums. Making it their finest so far. "Its the sound of a band who've been bound together by music since they were kids."

They have toured extensively all over the world and have gained a lot of respect within the music scene.

Hope you enjoy this great album, and bonkers concept.
