Geneva-based trio **Sinner DC** return with an all-new remix album, featuring 12 new versions and 4 interludes from their 2012 LP **"Future That Never Happened"**.

Far from being a patchwork collection of remixes, **"Ambient Mixes"** is a brand new album; an 80-minute cinematic trip following the tradition of ambient/chillout albums in the vein of The Orb, Le Coeur, and KLF....

Dropping on **Mental Groove Records**, home of Luciano and Miss Kittin & The Hacker among others, **"Ambient Mixes"** comes as **Sinner DC** have just finished their new album "MAPS" - a collaboration with Pete Kember aka Sonic Boom, founding member of legendary alternative neo-psychedelic rock band Spacemen 3.

Having been a key influence on the likes of My Bloody Valentine and producer for MGMT and Panda Bear, Sonic Boom's involvement marks another milestone for **Sinner DC**, which will begin in late 2014 with **"Ambient Mixes"**.

"Ambient Mixes" is released on 17th Nov 2014 on digital, digipack CD and 2x vinyl.
